**Indication of any immediate medical and special treatment needed:** No information available.

### Section 5: Fire-fighting Measures

#### Flammable properties

Flash point 100 °C

#### Firefighting

Suitable extinguishing media Use water spray, alcohol-resistant foam, dry chemical, fog or carbon dioxide.

Unsuitable extinguish media Do not use a solid water stream as it may scatter and spread fire.

#### Protective equipment and precautions for firefighters

Specific hazards during firefighting Carbon oxides.

Specific protective equipment for firefighters Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA. Structural firefighter's protective clothing will only provide limited protection. Wear self-contained breathing apparatus with a full-face piece operated in the positive pressure demand mode when fighting fires.

Specific methods Use water spray to cool unopened containers

**General fire hazards** Static charges generated by emptying package in or near flammable vapor may cause flash fire.

### Section 6: Accidental Release Measures

**Personal precautions** Use personal protective equipment. Avoid breathing vapours, mist or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. For personal protection see

section 8.

**Environmental precautions**

Do not let product enter drains. Prevent further leakage or spillage if safe to do so. Do not contaminate water. Avoid release to environment.

**Methods for cleaning up**

Soak up with inert absorbent material and dispose of as hazardous waste. Keep in suitable, closed containers for disposal.

## **Section 7: Handling and Storage**

**Storage**

Store in cool place. Keep container tightly closed in a dry and well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage.

**Handling**

Keep away from heat and source of ignition. Avoid contact with skin and eyes. Avoid inhalation of vapor or mist. Normal measures for preventive fire protection.

**Specific end use(s)**

No information available.

## **Section 8: Exposure Controls/Personal Protection**

**Control parameters:** Components with workplace control parameters.

### **Exposure controls**

**Appropriate engineering controls**

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

### **Personal protective equipment**

**Eye/face protection**

Safety glasses with side-shields conforming to EN166 Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

**Hand protection**

Type of gloves recommended: Butyl rubber. Minimum breakthrough time/ gloves: 480 min. Minimum thickness/ gloves 0.11 mm.

**Body protection**

Impervious clothing, the type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

**Respiratory protection**

Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

**Thermal hazards**

Wear suitable protective clothing to prevent heat.

**Environmental exposure controls**

Avoid discharge into the environment. According to local regulations, Federal and official regulations.

**Industrial hygiene:**
